

# ClamAV Antivirus

This simple tool allows to check ClamAV Antivirus status, giving you information about signatures database and it's updates.

Libraesva ESG uses additional malware and phishing signatures from SaneSecurity. You can switch it on/off by clicking on the corresponding button.

The screenshot shows the Libraesva Email Security web interface. At the top, there's a logo for 'LIBRAESVA EMAIL SECURITY'. Below it is a navigation bar with links: Home, System (active), Reports, Quarantine, and Search. On the right of the navigation bar are three circular icons: a shield, a user, and a refresh. Below the navigation bar is a secondary bar with dropdown menus: Appliance, Mail Transport, Content Analysis (highlighted), Authentication, and High Availability. The main content area has a green header 'Clamav Antivirus Status'. Below this header is a table with the following data:

Version:	ClamAV 0.101.5
Virus Identities:	25688
Database Timestamp:	Wed Jan 8 10:56:24 2020
SaneSecurity Signatures:	Enabled

At the bottom of the table are two buttons: 'Disable SaneSecurity' (orange) and 'Update Virus Defs' (green).

When using SaneSecurity Signature you may choose:

- Disable SaneSecurity
- Manually update virus definitions
