

# Libra Esva 3.1 upgrade script fails to update clamav antivirus

## PROBLEM

Libra Esva upgrade script from version 3.0.1.0 to 3.1 fails to download update package clamd and Libra Esva stops processing mails.

## SOLUTION

Login as root or call support if you do not have credentials or tech skills.

Copy and Paste the followings:

```
yum upgrade clamd -y
/usr/bin/sudo /bin/sed -i "s/DatabaseDirectory
/var/clamav/DatabaseDirectory /var/lib/clamav/"
/etc/freshclam.conf
/usr/bin/sudo /bin/sed -i "s/DatabaseDirectory
/var/clamav/DatabaseDirectory /var/lib/clamav/"
/etc/clamd.conf
/usr/bin/sudo /bin/sed -i "s/User clam\b/User clamav/"
/etc/clamd.conf
chown -R clamav:clamav /var/run/clamav/
chown -R clamav:clamav /var/lib/clamav/
/usr/bin/sudo /bin/sed -i "s/var/clamav/var/lib/clamav/"
/usr/local/sbin/scripts/freshclam
/usr/bin/sudo /bin/sed -i "s/create 644 clam clam/create 644 clamav
clamav/" /etc/logrotate.d/freshclam
/usr/bin/sudo /bin/sed -i "s/create 644 clam clam/create 644 clamav
clamav/" /etc/logrotate.d/clamav
/usr/bin/freshclam
/etc/init.d/clamd start
/etc/init.d/MailScanner restart
```
