

Libraesva ESG hostname change

You can easily change hostname of your Libraesva ESG appliance.

If the appliance is on Libraesva cloud you have to open us a ticket from <https://libraesva.freshdesk.com>

If the appliance is on-premise or in your cloud you can follow the below steps:

1. create a new A record with the new FQDN of your appliance
2. change your reverse DNS record with the new hostname
3. wait till 72h to let all settings propagated into worldwide DNS
4. change the hostname: system > appliance > networking > network settings > Hostname (reboot needed)
5. update certificates
 1. system > appliance > networking > web HTTPS certificate
 2. system > mail transport > TLS > default certificate
6. update report link URL: system > appliance > quarantine settings > general settings
7. open a ticket to <https://libraesva.freshdesk.com> if you have quarantine reports configured
