

Messages bounced with “552 5.2.0 Invalid 7-bit DATA” error

PROBLEM

The message bounced with the following error:

552 5.2.0 Invalid 7bit DATA (in reply to end of DATA command)

The following MIME is used:

MIME-Version: 1.0

Content-Type: multipart/mixed; boundary="MAIL_BOUNDARY"

Content-Transfer-Encoding: 7bit

SOLUTION

To resolve the issue, contact your third-party mail editor to modify the “Content-Transfer-Encoding” parameter from:

Content-Type: multipart/mixed; boundary="MAIL_BOUNDARY"

Content-Transfer-Encoding: 7bit

to:

Content-Transfer-Encoding: binary
