# Static Routes

**PROBLEM:**

How can i add a static route to Libra Esva?

 **SOLUTION:**

After 3.3.1:
Yes! You can define static root easly by:
*System->  Networking and System Services ->  Static Route*

Before 3.3.1:
Static routes can be added only from a root account logged in console. Follow standard OS guideline, at the following
link: http://www.centos.org/docs/5/html/5.1/Deployment_Guide/s1-networkscripts-static-routes.html
