Not Authorized! You must be on a Trusted Network release error

PROBLEM

When releasing a message you receive the following error:

SOLUTION

This is due to more restrictive policies of this new release. To resolve change the setting *"Allow Anonymous User actions"* under menù System->Authentication->User Management :

| ppliance | • Mail Trans | port + Content A | nalysis - Authenticat | tion - High Availa | bility - |
|------------------------------------|--|--|---|---------------------------|---|

and set it to "from any address".

Otherwise you should provide a list of "Safe Networks" in the table below.
